

February 1, 2024

Dear families,

The new Springhill Elementary school is taking shape and much work has continued since our last update to families and community members.

Update

- The building is now weather tight.
- Installation of interior partitions, along with mechanical and electrical systems is ongoing

We are continuing to share updated images and videos of the work on the new school [on the CCRCE website](#).

Our recent project update from the construction team indicates another adjustment to the project's substantial completion date.

As a result, from the continuous unfavourable weather over the summer and fall months, the substantial completion date has been revised from March 2024 to late spring 2024.

At this time, we do not have a projected move in date, however, we are working closely with the province and construction team, and will share the move-in date as soon as confirmed.

Sincerely,

Chris Zwicker  
Director of Operational Services  
Chignecto Central Regional Centre for Education
